

CABIN AIR FILTERS

Cabin Air Filter - Focus

REMOVAL & INSTALLATION

NOTE: Some 2005 and later models may not be equipped with a cabin air filter.

NOTE: Manufacturer's terminology for this filter is pollen filter or passenger compartment air filter.

CABIN AIR FILTER

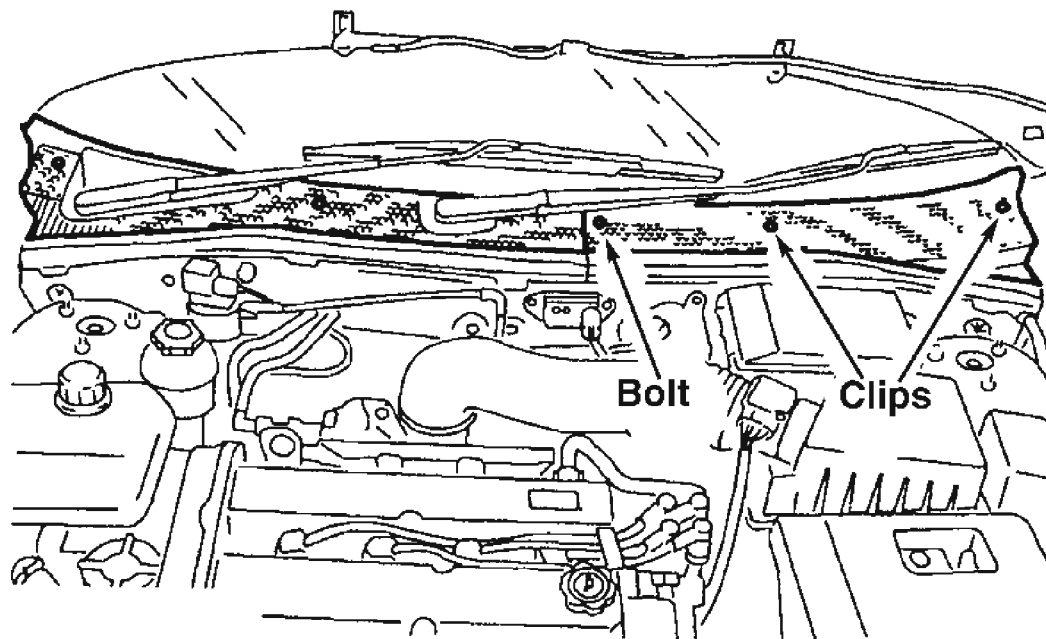

Removal

1. Place windshield wipers in vertical position. Open hood.

NOTE: Gasket will be destroyed when the air cowl grille is removed.

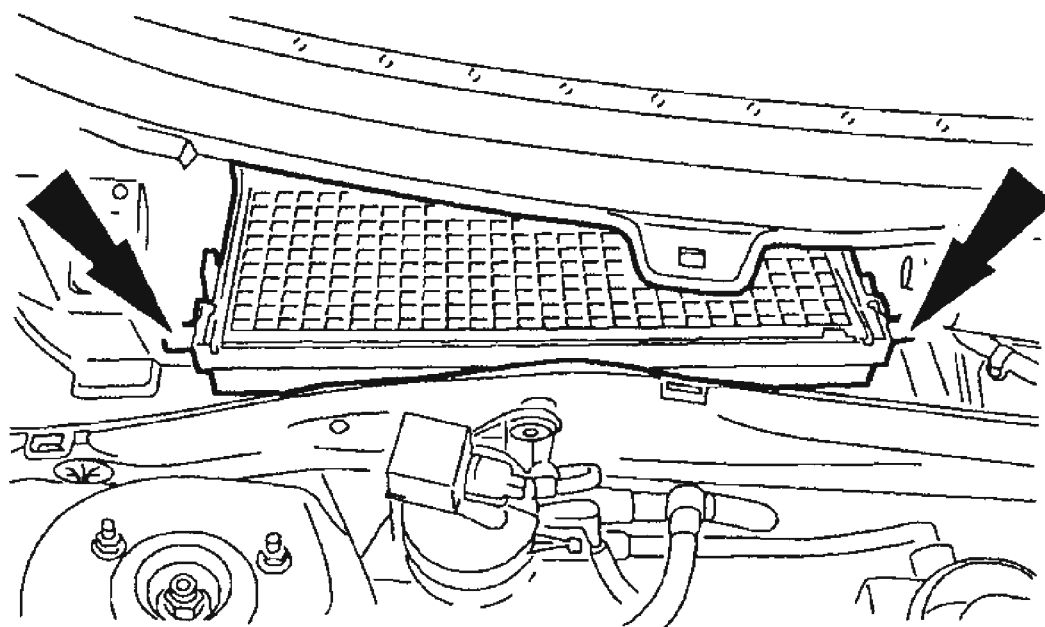

2. To detach the passenger side half of the cowl grille unclip the 2 clips, remove the cap and unscrew and remove bolt. See **Fig. 1**.
3. Remove the pollen filter by opening the service flap and remove the pollen filter. See **Fig. 2**.

NOTE: Right hand drive vehicle is shown in **Fig. 1**. Cabin air filter is located on passenger side of engine compartment on left hand drive vehicles.

Installation

1. Install the pollen filter.
2. A grille with rubber edging is inserted between the wiper motor and the filter housing. This must be cleaned of dirt every time the filter is changed.
3. Install the air cowl grille. The manufacturer recommends installing a NEW air cowl grille gasket. Ensure the air cowl grille gasket for the windshield is seated correctly.
