Table of Contents

Introduction

Plan 9 From Bell Labs 1
Rob Pike, Dave Presotto, Sean Dorward, Bob Flandrena, Ken Thompson, Howard Trickey, and Phil Winterbottom
An overview of the system; read at least this paper before you install.

The Use of Name Spaces in Plan 9 29
Rob Pike, Dave Presotto, Ken Thompson, Howard Trickey, and Phil Winterbottom
What's in a name?

Getting Started With Plan 9 29
Some orientation and setup information.

The Organization of Networks in Plan 9 35
Dave Presotto and Phil Winterbottom
Connecting the pieces. The details in the paper are outdated but the ideas still apply.

Programming

How to Use the Plan 9 C Compiler 49
Rob Pike
The starting point for C programming under Plan 9.

APE — The ANSI/POSIX Environment 63
Howard Trickey
Moving C code between UNIX and Plan 9.

Acid: A Debugger Built From A Language 141
Phil Winterbottom
An overview paper about the Acid debugger.

Acid Manual 155
Phil Winterbottom
The reference manual for the language and its libraries.

Maintaining Files on Plan 9 with Mk 181
Andrew G. Hume and Bob Flandrena
An introduction to Plan 9's replacement for `make`.

Plan 9 Mkfiles 195
Bob Flandrena
The conventions for using `mk` in Plan 9.

A Manual for the Plan 9 assembler 203
Rob Pike
Things you'd rather not know.

User Interfaces

8½, the Plan 9 Window System 211
Rob Pike
An introduction to the (previous) window system and its unusual implementation.

Rc — The Plan 9 Shell 221
Tom Duff
An introduction to the new shell, complete with examples.

The Text Editor sam 237
Rob Pike
Sam is the standard editor on Plan 9.

Acme: A User Interface for Programmers 267
Rob Pike
A system with a more radical approach to programming and editing.

Plumbing and Other Utilities 268
Rob Pike
Inter-process communication that enlivens the interactive user interface.

Implementation

Hello World, or Καλημέρα κόσμε, or こんにちは世界 283
Rob Pike and Ken Thompson
The details about Plan 9's character set: the Unicode Standard plus an ASCII-compatible encoding.

Plan 9 C Compilers 295
Ken Thompson
The design and some internals of the compiler suite.

Adding Application Support for a New Architecture in Plan 9 305
Bob Flandrena
The procedures necessary to add a new instruction set to Plan 9's programming environment.

The Plan 9 File Server 313
Ken Thompson
The design of the central file server and its novel backup system.

The IL protocol 321
Dave Presotto and Phil Winterbottom
A description of the Internet protocol Plan 9 uses for internal communication.

Lexical File Names in Plan 9, or, Getting Dot-Dot Right 322
Rob Pike
A vexing old problem solved: how to make pwd get the right answer in the face of multiply-bound directories.

Process Sleep and Wakeup on a Shared-memory Multiprocessor 327
Rob Pike, Dave Presotto, Ken Thompson, and Gerard Holzmann
A detailed study of a central issue in the Plan 9 kernel.

Miscellany

A Guide to the Lp Printer Spooler 363
Paul Glick
Adminstering the suite of tools to drive PostScript printers.

Troff User's Manual 371
Joseph F. Ossanna and Brian W. Kernighan
The old warhorse, updated for Unicode characters.

Using SPIN 411
Gerard Holzmann
An introduction to a tool for analyzing parallel and distributed programs.

Installation

The Various Ports 439
The hardware requirements for the Plan 9 compilers and kernels.

Installing the Plan 9 Distribution 447
Getting the system up and running, using a PC.
